

FILTRA Timber

Sustainable Timber Supplies - Philippines

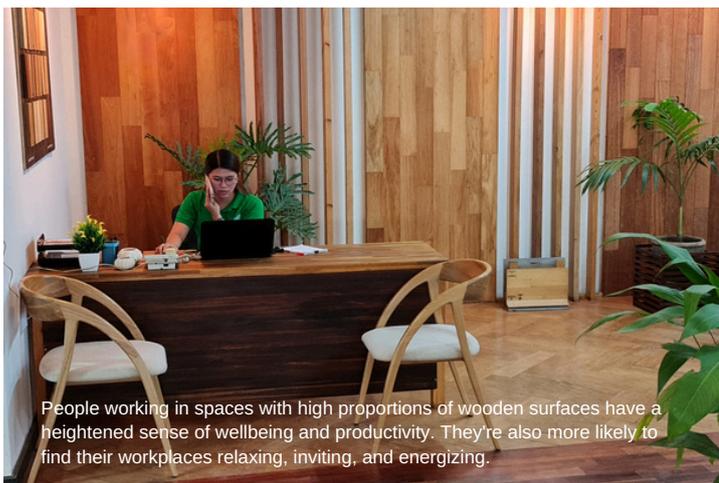

FILTRA Timber is supplying sustainable wood to a wide range of wood consuming industries in the Philippines. Our project division likewise has a wide range of project clients. From log cabins in the mountains to very durable wood solutions for beach and golf resorts, as well as flooring and decking for private residences, and commercial buildings.

WOOD STORES CO2

Wood is the most sustainable building material. Wood has significantly less environmental impact than steel or concrete, not to mention plastic, etc.

A study made by The Consortium on Research of Renewable Industrial Materials (CORRIM) found that using wood uses less energy overall and releases much less Co2. When using wood, the Co2 stays locked in the material.

People working in spaces with high proportions of wooden surfaces have a heightened sense of wellbeing and productivity. They're also more likely to find their workplaces relaxing, inviting, and energizing.

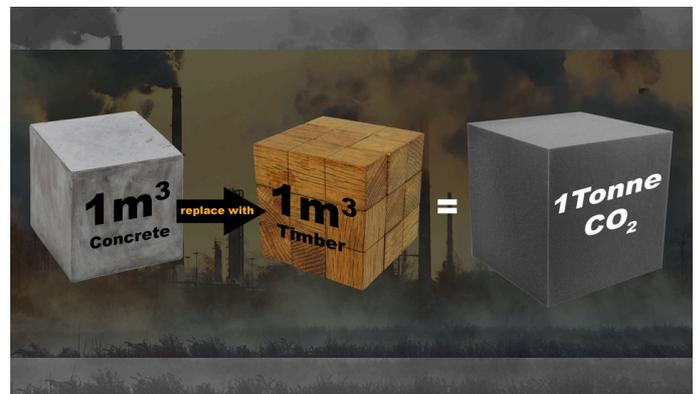

DO YOU HAVE A POLICY FOR ONLY USING LEGAL, SUSTAINABLE WOOD?

Yes, we are committed to sustainability and have a strict policy of only using timber sourced from legal, verifiable, and sustainable forests. We hold internationally recognized certifications (such as FSC® or PEFC™)

(FSC® License Code: FSC-C111088)

SUSTAINABLE OFFICE DESIGN AND FURNITURE IS POSSIBLE!

More and more companies specify that all their timber-based products must come from sustainable wood. Furniture, flooring, cladding, packaging, pallets, and much more. All is possible to supply from certified sustainable wood, right here in the Philippines.

SUSTAINABLE GREEN BUILDINGS

Filtra Timber is a proud member of The Philippine Green Building Council an organization that promotes sharing knowledge about green practices with the property industry to ensure a sustainable environment.

Filtra Timber also offers FSC® Certified Products that can contribute to LEED credits, which can help achieve a Green Building Certification. (See FILTRA Timber's FSC® and PEFC™ certified products)

Certified Sustainable Wood is available in the Philippines!

FILTRA Timber is one of the leading timber importers in the Philippines and uniquely offers imported wood from legal and sustainable sources. FILTRA Timber is FSC® and PEFC™ certified, which means that we can import and sell certified sustainable wood products while maintaining an unbroken chain of custody. For more information, please contact us for our FSC® and PEFC™ certified products.

Our customers are furniture and door producers, as well as other wood-consuming industries, and we also offer flooring, cladding, and other interior décor produced from sustainable wood.

The mark of responsible forestry

FILTRA Timber Presents Sustainable FIBA World Cup Floors

Filtra Timber is the exclusive distributor of Junckers Flooring, produced in Denmark. It was used in the FIBA World Cup 2023, which was played in Manila at 3 different venues, and has been used in the Paris Olympics 2024.

All the flooring chosen is Junckers certified sports flooring.

Junckers uses wood sourced from sustainably managed forests, primarily in Northern Europe. They hold Chain of Custody certifications from internationally recognized schemes.

Filtra Timber on UNESCO and Sustainable Development Goals

Based on the UNESCO and Sustainable Development Goals, Filtra Timber has been practicing 9 out of 17 key sustainable goals for over a decade now and continues to integrate them into our operations today.

This long-term commitment demonstrates that responsible forestry, material sourcing, and operational efficiency are not just marketing tools but fundamental business practices in our company.

We  to TM
Talk wood!

FILTRA TIMBER is the trading name for the wood production activities of Philippine and Scandinavian design, FILTRA inc.
